

Cross Member
Useful for raising front of car-must use a large board.

Cross Member

Front Chassis
Can be used-better to use stronger areas to the rear of it.

Front Chassis

Suspension Bearing Area
Use with board.

Avoid

Suspension Bearing Area

Heavy Metal Plate
Use anywhere-use board at outer edge.

Front Jacking Bracket
Heavy Metal Plate

Chassis Side Rail
Use only with board. Usually only employ area near jacking bracket, but if solid, can be used anywhere on its length.

Chassis Side Rail
3 inches wide-runs length of chassis from front wheels to rear wheels.

Wheel Changing Bracket

Suspension Cylinder Bracket
Use carefully and only with board.

Suspension Cylinder Bracket
